Quality Policy of HERUTU ELECTRONICS CORPORATION

HERUTU ELECTRONICS CORPORATION (hereinafter referred to as the “Company”) strives to improve business quality and continue to create the highest quality products and services in order to provide experiences that exceed customer expectations.

1. To improve the quality of the Company’s business activities (research, consulting, design, development, manufacturing, sales, support activities of industrial wireless products and their related activities), the Company and all employees set quality goals and work together to promote continuous improvement of the quality management system.
2. The Company will promote the foundations of work quality: “creating an environment where employees can demonstrate their individuality”, “building an efficient and effective system”, and “sharing and accumulating knowledge”.
3. The Company will comply with quality-related laws, regulations, agreements, etc. related to its business activities.
4. The Company will promote internal education and internal public relations activities so that all employees can act autonomously in accordance with the quality policy.
5. The Company will disclose the implementation status of quality management as necessary.

Akihiko Kinoshita

President
